Section 3 - Hazards Identification

NFPA RATINGS: Health: 1 Flammability: 0 Reactivity: 0

EMERGENCY OVERVIEW: As part of good industrial and personal hygiene and safety procedure, avoid all unnecessary exposure to the chemical substance and ensure prompt removal from skin, eyes and clothing.

EYE CONTACT: Contact may cause mild irritation, redness, and pain.

SKIN CONTACT: Prolonged exposure may cause irritation.

INHALATION: High concentrations of dust may cause coughing and sneezing.

INGESTION: Extremely large oral doses may cause gastrointestinal disturbances.

Section 4 - First Aid Measures

EYES: Immediately flush eyes with water; remove contact lenses, if present, after the first 5 minutes, then continue flushing eyes for at least 15 minutes lifting the upper and lower eyelids intermittently. Washing eyes within several seconds is essential to achieve maximum effectiveness.

SKIN: Wash with soap and water. If irritation occurs and persists, obtain medical attention.

INHALATION: Remove to fresh air. Give artificial respiration if not breathing. If breathing is difficult, give oxygen.

INGESTION: Never give anything by mouth to an unconscious or convulsive person. If swallowed, do not induce vomiting. Give large amounts of water. If vomiting occurs spontaneously, keep airway clear. Give more water when vomiting stops.

Section 5 - Fire Fighting Measures

FIRE AND EXPLOSION HAZARDS: Non-combustible

EXTINGUISHING MEDIA: Use extinguishing agents appropriate for surrounding fire.

Section 6 - Accidental Release Measures

Sweep up and containerize for reclamation or disposal. Vacuuming or wet sweeping may be used to avoid dust dispersal. Residue may be flushed to sewer with plenty of water.

Section 7 - Handling and Storage

HANDLING: Avoid contact with eyes. Wash thoroughly after handling. When mixing, slowly add chemical to water. Never add water to chemical.

STORAGE: Keep container tightly closed and properly labeled. Store in cool, dry area, away from acids.

Section 8 - Exposure Controls and Personal Protection

VENTILATION: Provide respiratory protection when excessive dust may be generated.

SKIN: Dry product is generally non-irritating to intact skin but can be irritating where skin has been damaged and can create skin irritation after long exposures when moisture is present. Under such conditions, gloves are recommended contact.

EYE PROTECTION: Wear safety glasses with side shields if direct exposure is possible.

Section 11 - Toxicological Information

When in solution, this material may affect all tissues with which it comes in contact. The severity of the tissue damage is a function of concentration, the length of tissue contact time, and local tissue conditions. After exposure there may be a time delay before irritation and other effects occur.
