

# ProGuard® White Nitrile Gloves

## 8641 Exam and 8643 General Purpose

### The time is right to switch from Latex!

- Latex contains a protein that can cause moderate to fatal allergic reactions.
- 1-6% of the general public is sensitive to latex, and 8-12% of medical workers are sensitive to latex.
- Prolonged wear and exposure increases the chance of latex sensitivity. This is why medical workers are more sensitive.

### Disposable Nitrile

- FDA compliant
- 9.5" length
- ambidextrous; textured grip
- extremely stretchable
- better chemical resistance, especially solvents and animal fat
- similar barrier protection to latex
- greater snag, puncture, abrasion & cut resistance
- higher tensile strength
- allergen free
- 8641 applications: medical and dental, lab work, handling blood and bodily fluids, food service
- 8643 applications: cleaning, assembly, parts handling
