

NEW Griptite 2 Trays

Griptite 2. A service tray built for the real world

Griptite 2 Trays' patent-pending, non-skid surface is designed to grip drinks and plates better than any existing tray. The new surface not only prevents spills, but is designed to look and feel like new for years. Our new GT2 surface helps your bar or restaurant by increasing skid resistance to lower the cost of spilled drinks, food and potential falls. Additional coating on the sides of the trays reduces wear and tear due to drops and handling. Improved stain resistance keeps your trays looking new longer.

Function. Durability. Aesthetics.

- Better **function**. New surface has the best skid resistance in the industry. Unlike current trays, it does not degrade over time. This saves money and increases serving efficiency by preventing drops, spills and falls.
- Improved **durability**. The new non-skid surface is similar to what is used on pickup truck bed liners.
- New coated edges increase durability.
- Better **aesthetics**. New surface is darker and more modern. No sanded edges are visible.

More Information On Back

Griptite 2

Engineered to Perform

Griptite 2 Trays went through rigorous testing to make sure they excelled in function, durability and held up their aesthetics longer than any tray in the market. Our engineers built this tray from the ground up with one thing in mind: unmatched quality.

NSF Listed

Slip Test

Reduce waste and limit spills.

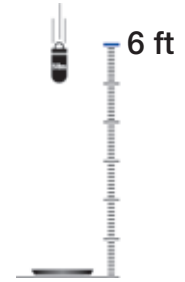

Griptite 2 Tray holds a full glass at a steeper angle.

Impact Test

Save cost by using longer lasting trays.

Griptite 2 Tray withstands a 5 pound impact from a 6 foot drop.

Stain Test

Tray's surface will look new after heavy use.

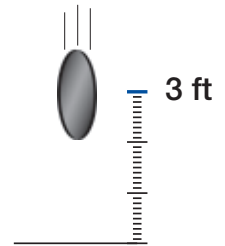

Griptite 2 new surface resists staining and keeps trays looking better longer.

Drop Test

Dropped trays don't need to be replaced.

Griptite 2 Trays can be dropped on their edge from 3 feet with no damage.
