## Five Brush ELECTRIC SCRUBBERS

**LIFETIME LIMITED WARRANTY!**  
 • One year parts/labor standard  
 • Two year Extended Warranty available.

**QUICK • EASY • EFFICIENT • RELIABLE**

**MODEL AA**

Fits all standard bar sinks easily requiring no special plumbing or electrical work. The quiet UL and CSA listed motor has a forward mounted on/off switch. The Exclusive Overload Safety Switch assures longer life. Available with ground fault protection plug.

**MODEL AA-SUB**

The AA-SUB is entirely submersible allowing for use in establishments with less clearance under the bar. The hermetically sealed motor, with stainless steel safety band, has automatic overload for protection from overheating and a standard ground fault circuit protector on the cord. Ready to plug in and go to work for you.

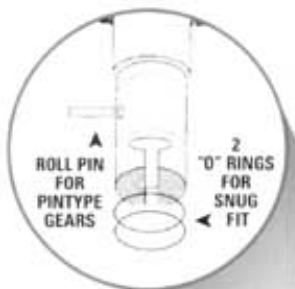

**MODEL TURBO-PS**

Turbo PS is a cost saving alternative to soak sinks as it agitates the water as it cleans. This product fits in all standard kitchen wash sinks requiring no special plumbing. Uses standard 115V three prong outlet and has ground fault protection built in for added safety. Completely portable, it is easily lifted out of the sink.

## UNIVERSAL REPLACEMENT BRUSHES

*Fits every current make like original equipment, GUARANTEED!*

Included with each Universal Replacement Brush

Glass Pro now offers six stock replacement brushes to fit all current glass washers. From shot glasses to coffee bowls to tall Collins and Weis glasses, these brushes will work for you to achieve peak performance. If a stock brush doesn't fill your needs, let us know and we can produce one that will. As a universal brush, it eliminates over-stock and shipping errors.

## SPECIFICATIONS

**MODEL AA**

- 1/3 H.P. UL/CSA listed motor
- 115V 60Hz (or 220V - 50Hz)
- Exclusive overload safety switch
- 17 3/4" tall, 12" deep, 9" wide
- Carton size: 15" x 9.5" x 18.25"
- Shipping weight: 22 lbs.
- Optional ground fault protection

**MODEL AA-SUB**

- 1/3 H.P. UL/CSA listed motor
- 115V 60Hz (or 220V - 50Hz)
- Overload safety switch
- 11" tall, 12" deep, 9" wide
- Carton size: 15" x 9.5" x 18.25"
- Shipping weight: 24 lbs.
- Standard ground fault protection

**MODEL TURBO PS**

- 1/3 H.P. UL/CSA listed motor
- 115V 60Hz (or 220V - 50Hz)
- Overload safety switch
- 16.5" tall, 12" deep, 9" wide
- Carton size: 15" x 9.5" x 18.25"
- Shipping weight: 25 lbs.
- Standard ground fault protection

## SPECIAL FEATURES

*Preferred by quality committed dealers, specified by chains and appreciated by independents, Glass Pro is the only five brush glass washer manufacturer proven dedicated to producing the best product and customer loyalty!*

None more powerful with an \*exclusive overload safety feature that prevents motor burnout and incidental turn on that can cause serious injury. Another \*exclusive is a seven point water deterring safeguard that prevents water from entering the motor when the unit is turned on its side against instructions.

Space age polymers and a redesign gives us as much as 45% more material in wear spots where it counts. We've eliminated the notch cut in the side of the brush sleeve and the plastic pin on the brush that has proven to be a repair nuisance. Longer wear, no breaking!

New tooling forms a naturally high lubricity Lupital® bearing with far less friction than a bronze bushing. This unbreakable bushing is NSF and FDA Listed and can †drastically reduce gear wear. Bronze bushings are oil lubricated and quickly lose their lubricity as the oil is washed away by glass washing detergents designed to remove oil and grease.

Nine strategically placed support columns, 25% more than others creates a considerably more durable base structure. This construction holds up when others won't.

\*Exclusive to Model AA only compared to other brands of upright glass washers.

†Based on tests of dynamic friction coefficient and specific wear loss.
