

Softserve
Sanitation

What you will need:

3 gallon bucket (or larger)

2.5 gallons water

1 Chlor-Tab

Quick Clean Directions

1. Drain softserve from reservoir.
2. Fill reservoir with warm water.
3. Drain reservoir to remove solids.
4. Add 1 Chlor-Tab to bucket.
5. Add 2.5 gallons warm water to bucket.
6. Allow tablet to dissolve.
7. Add sanitizer to reservoir.
8. Drain sanitizer.
9. Refill reservoir with softserve.
10. Run softserve until product dispenses normally.

For full breakdown cleaning directions, refer to owner's manual.

NOTE

Depending on your machine size, there may be chlorine solution remaining. Use this solution to soak any external parts or fittings that need to be sanitized. Otherwise this product may be safely poured into any sink or floor drain.
