## PORTABLE JUG HOLDER STAND

- 2" black powder coated steel tube for unparalleled strength & stability - superior to cast iron, which is soft & brittle
- Jug holding plate is bolted to tube for easy change of accessory plates
- Universal openings in jug holding stand accommodate a variety of fastening methods (if desired)
- 2" tube configurable with:
  - 18" steel triangular base
- Three-piece construction for quick assembly
- Oak Street uses short bolts to screw into welded anchor plates within the tube to secure base to tube - this is a much improved method than competitors, which use a long rod that torques & stretches when force is applied - making the base permanently loose from the tube
- Part #: PJHS-18-TRIANGLE
- F.O.B. Iowa
