The Shape of the Future

Smooth and curvy, ergonomic and practical. The Bloomfield glass decanter is designed to do more than just hold coffee. Its teardrop shape is a better fit for warmer plates, is easier to clean and allows us to put more glass on the sides where it is needed most. The handle is permanently bonded, attaching onto the glass using a large contact surface. Our sculpted thumb rest delivers better control while pouring. No slips. No drips. You can even choose from sixteen handle colors (left) and fifteen ink choices for a distinct company look. The Bloomfield glass coffee decanter, a rare combination of style and substance.

Better by Design

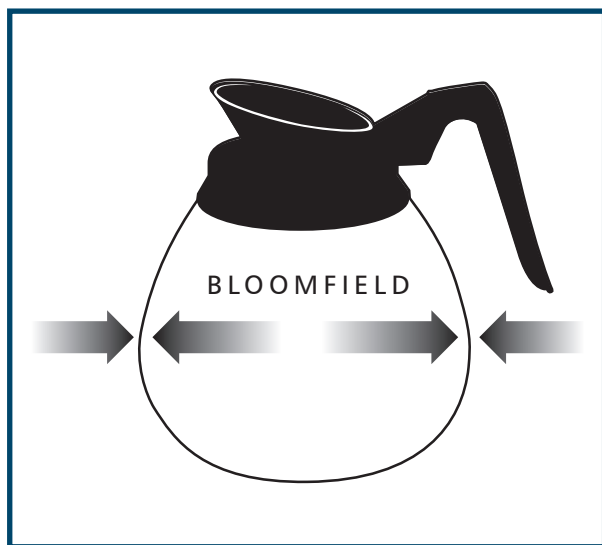

- Carafes are created using a computer-controlled process that ensures uniform wall weight for maximum strength
- The thicker bottom of the decanter helps to provide insulation against over-heating
- The unique decanter shape and no-drip spout guarantees no-mess pouring and makes it much easier to serve to the last drop
- Handle is permanently affixed to the bowl using a proven superior bonding process
- Personalize the look by selecting from 16 handle colors (left) and 15 ink choices
- Bloomfield's high quality glass will not stain or discolor

Strength of Design

The true test of any glass decanter is how it holds up to real-world, everyday restaurant use. Which is precisely why we've built our decanter to have extremely consistent side walls. A test made by an independent laboratory showed that Bloomfield glass provides a high level of side impact resistance. This test evaluates the break strength at the major diameter of the carafe, the area that is most prone to in-use impacts.

Quality of Manufacturing

Computerization and a state-of-the-art Oxyfueled furnace provide finite control over the melting of raw materials. When each decanter is formed, it is the result of continuous monitoring of the melting process. The goal is to optimize forming conditions - the result is built in quality with uniform wall weights, excellent break strength and improved function. Human operators, along with computers, make a minimum of 14 major quality checks on every carafe. These tests include an hourly check of glass thickness and daily chemical composition testing. Every carafe is gauged for critical dimensions and receives 100% visual inspection before packing. Each pallet is further sampled by trained QC inspectors before final release.

Ease of Use

Our contour design is a much better fit for warmer plates, providing a larger, more even heating surface. The teardrop shape also makes it easy to completely empty the decanter, eliminating the need to turn the wrist at an unnatural angle. Hands of all sizes comfortably fit the handle, and a sculpted thumb rest ensures a safe, controlled grip and precise pour.

PRODUCT NUMBER	DESCRIPTION	STANDARD PACKAGE	FEATURES
8900	GLASS DECANTER, WITH BLACK HANDLE	24	World-wide leader in glass decanters offering sixteen handle band colors and fifteen ink choices to create your company image.
8901	GLASS DECAF DECANTER, WITH ORANGE HANDLE	24	
8903	GLASS DECANTER, WITH BLACK HANDLE	3	
8906	GLASS DECANTER, NO IMPRINT WITH BLACK HANDLE	24	
8913	GLASS DECAF DECANTER, WITH ORANGE HANDLE	3	
8923	GLASS DECANTER, NO IMPRINT WITH BLACK HANDLE	3	

Bloomfield is concerned with the safety of anyone using our products. Please be sure to train your employees on the safe use of decanters.

WARNING TO AVOID BREAKAGE AND INJURY

DO NOT: boil liquids in pot, heat empty pot, use on range top of any kind, clean with materials that scratch, bump, pour toward people or carry two or more decanters in one hand

DISCARD: if cracked, scratched or heated empty
