Waring® Commercial Food Processors

This food processor line features the same performance and reliability you have come to trust in Waring Commercial. With over 70 years in the commercial food service business, backed by 300 service centers and a growing list of accessories, Waring delivers value as well as great food results. Along with standard processing discs and blade, this line features the new LiquiLock™ Seal System that holds liquids in the bowl while processing and keeps the S-blade in the bowl while pouring! With these added benefits and a continuous feed option, the FWP14S and WFP14SC has unparalleled versatility that no kitchen should do without.

Important Features

- Sealed, clear-view 3.5-qt batch bowl – process soups, sauces, marinades and more, without leaks. You’ll know when it’s done because you’ll see it. Our high-impact, unbreakable and scratch resistant polycarbonate lets you see into the bowl, and it’s durable too. Put the bowl in your dishwasher when you’re done, or hand-wash it if you like. It’s lighter than metal, but it’s built for tough use and has a single handle for easy lift and balance.
- Sealed S-blade with LiquiLock™ Seal System – Blade locks in place for easier, safer pouring. Will chop, mince, puree, liquefy, and more while minimizing spillage.
- Easy ON and PULSE/OFF control paddles – All our models have them and you wouldn’t want them any other way. Better than constantly pushing the START and STOP buttons, the PULSE is perfect for fine-tuning the chop, or breaking down heavy loads.
- Stainless steel drive shaft – heavy-duty construction for professional performance; built to last.
- Extra-large feed chute/funnel and food pusher – A large tube reduces preparation time. The feed tube keeps a steady supply of food coming down the chute. Or, use the small food pusher for shorter shreds and slices. The large pusher also acts as the small pusher’s feed tube!
- Slice, shred, mix, purée and chop! – Quality accessories make the WFP14S/WFP14SC versatile enough for any food processing job, with the convenience of a detachable stem to switch tasks with ease.

Safety Features

- Thermal overload protection – Protects motor from damage from overuse and heavy-duty loads.
- Sealed S-blade that locks into bowl – Pour liquids out, keep the blade in! LiquiLock system allows you to pour processed food out of the batch bowl while keeping the blade safely attached.
- Safety Interlock System – Machine will not operate unless all parts are securely in place.

WFP14SC also includes:

3.5 Quart Batch Bowl Food Processor – WFP14S

3.5 Quart Combination Continuous Feed/Batch Bowl Processor – WFP14SC

Specifications

Item	Electrical	UL/ETL
WFP14S	120 VAC, 60 Hz, 6 Amps	UL, ETL
